

To Whom It May Concern,

I have had a chance to meet Paula Stokowska during her studies on Financial Mathematics at Gdansk University of Technology. She attended classes of *Linear Algebra* in summer term 2014/2015 and *Programming in SAS* in summer term 2015/2016.

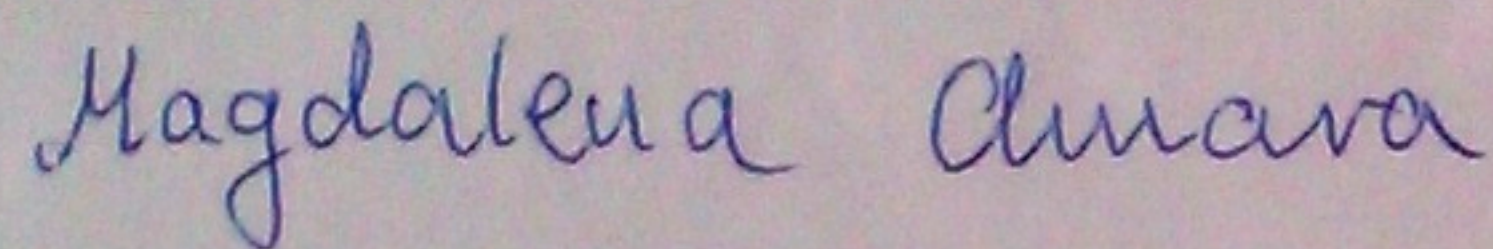

Paula Stokowska is a good, hardworking student. She takes her duties seriously and has a creative way of looking at things. I remember that she was really interested in basics of Data Analysis, programming in SAS and other programming languages. It is worth to say that Paula has very good communication skills.

Paula is also very flexible person. She was able to work and study in the same time and did her best to find time for all responsibilities.

To conclude, I am certain that Paula Stokowska would be a valuable asset to any future employer.

Yours sincerely,

Magdalena Chmara MSc., Eng.,

Assistant

Department of Nonlinear Analysis and Statistics

Faculty of Applied Physics and Mathematics

Gdansk University of Technology
