Experience

Intel Corporation (2017 – CURRENT)

UEFI FW (BIOS) Test Developer

Tools: .NET (Visual Studio), Git, JIRA (Agile,Scrum)

BIOS automatic validation coordination on simulation and hardware products

I **was designing, implementing and executing automatic tests** design in C#

I **improved** all existed tests and **increased** the number of tests three times

I provided **the highest requirements coverage** for my project in our team

I was **managing** subcontractors team, introducing them into new projects, providing trainings, delegating task and validating their work in Agile system (JIRA)

I have created stable, indisputable tests based on specifications and client's/developers requirements which were the basis for many bugs found

SONY Pictures (2016 – 2017)

Junior Accountant (Excel, Outlook)

I was responsible for contacts with clients from all over the world

I was creating, validating and providing financial statements for clients

MISYS (2016 – 2016) *Internship*

I was **testing** the quality and correctness of changes in **the Web UI**

I have **created part of the specifications** in the newly created functionality for clients

MBS Systems (2014) *Internship*

Creating and **editing** an online store in **HTML**

Hi, I'm Paula!

No, not Paulina (a very popular name in Poland) and not Paola (The Queen of Belgium) .

... yes, in my ID card there is also Paula 😊

Maybe I'm not great with frameworks but I can learn. Or ask fellow seniors.

....and I am an advanced user of Google, StackOverflow and Youtube tutorials called "Become a new Steve Jobs in one week".

....and I can dress according to the dress code - all in all I like elegant dresses.

I want to work with creative people who can think out of the box because I am ambitious, determined and hardworking person who knows that success is in the details.

In my career as a developer I would like to become a full-stack developer and move towards blockchain technology. Currently I am focusing on learning Java Script Frameworks and Web / Front-End Development.

I will be more than glad to work with you (it will be actually really awesome, but no pressure).

Education

Master's Degree at Maritime University (2020)

Electric Department

Electronics and Telecommunication

Undergraduate Studies at Gdansk University of Technology (2017)

Technical Physics and Financial Mathematics Department

Financial Mathematics

Technical School with an IT Profile

Skills

- **HTML5, CSS, JS** – creating websites with JS (check my portfolio)
- **GIT** – very good knowledge

- **JAVA** – simple apps, sorting, operating on files, basic libraries
- **SQL** – 6 months course , basic knowledge

Languages:

English - advanced in reading, writing and speaking

Polish – native speaker

TOEFL iBT English language certificate –80/120 (2017)

Hobby

Playing the piano and classical music have been my passion since an early age. Many solo concerts and in the school orchestra are my most beautiful memories as well as lifelong friendships.

My new obsession is sewing. Under my mother's watchful eyes I learn the process of creating costumes and designing clothes. They are not wearable and they are basically a waste of material but my mother has a lot of it.

Financial mathematics, global stock exchanges, investments and financial policy have been my hobby for several years. I dreamed to become an actuary and take care of the insurance industry. My BA thesis was about risk theory.

I plan to increase my savings and invest in real estates.

And of course ... pole dance! Amazing female community, fascinating choreographies and slender figure – self confidence at master level guaranteed. I am in intermediate class and cannot wait to start in the first competition!
